Financial Data Analysis I

Programming with R: A Pragmatic Introduction
July 14, 2011

Description:
The Rmetrics Association (Asia Chapter), in association with IGIDR, is offering a high quality workshop in programming with R.

The course consists of four blocks, composed of 30% lecture, 20% examples and 50% case studies.

This workshop is a part of the three day series of workshops on Financial Data Analysis Using R from 14th July to 16th July, 2011, complemented by a two day workshop on Time Series Analysis using R.

Course Topics:
Session 1: Basics - Overview of R, Basic Syntax, Built-in Functions, R Objects & Data Structures, Logic, Loops and Control Structures, Effective Debugging in R

Session 2: Data Manipulation - Importing/Exporting Data, Data Structures, Manipulation of Data Structures

Course Audience:
This is a hands-on classroom introductory training course for R. It is well-suited to students, academicians, as well as finance and risk managers who desire comprehensive introduction to the R/Rmetrics software environment.
